Statement of Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-4, the prior art of record does not teach "a phase difference generating circuit for first mapping the phase difference to a first quadrant of a phase plane, subtracting the mapped difference by a default phase value to obtain a result and taking a square of the result; a selection circuit connected to the phase difference generating circuit for outputting the square of the result for every sampling point of a symbol to its corresponding output end; an accumulation module including accumulators whose number is equal to the number of the sampling points in a symbol, said accumulators receiving the outputs of the selection circuit for accumulating the squared results of the same sampling points of continuous neighboring symbols; and a comparison module for comparing the sums of the squared results outputted from the accumulators; the optimal sampling point corresponding to an accumulator having the smallest sum of the squared results."

Claims 5-11 are allowed for the same reason above because independent claims 5 and 9 recite similar limitations identified above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
